

# Custom Restaurant Website Development

Are you a restaurant owner without a website? Let me help you stand out and attract more customers online.

## What I Offer:

- A professionally-designed custom website coded from scratch (HTML/CSS/JS)
- Fast, mobile-friendly layout that looks great on phones and tablets
- Hero section with a call-to-action (e.g., 'See Menu')
- Menu section to showcase your best dishes
- Location section with Google Maps integration
- Contact form so visitors can reach you easily
- Your website deployed live and ready to use

## Why This Matters:

- Boost your restaurant's visibility and online credibility
- Attract new customers who search for food near them
- Show off your menu and make it easy to contact or visit

## Hosting Options:

You can host the website yourself (I'll help you set it up), or I can host and manage it for an additional fee.

## Pricing:

Starting at \$200 depending on your needs. Transparent, no hidden fees.

Ready to get started? Let's build your restaurant's online home.
